

Mixer

Ferraris

PRODUCT INFORMATION

- Bi-axial gyroscopic mixer
- Up to 40 kg
- Automatic clamping
- Maximum can height: 49.5 cm
- Fully extractable loading plate
- Programmable timer, 3 presets

The Ferraris automatic mixer (up to 40 kg) has been designed with a strong emphasis on serviceability, ergonomics and ease of operation. It features a fully extractable bottom plate for easy handling and automatic clamping.

The mixer can handle can heights up to 49.5 cm and is especially suitable for oval shaped cans (maximum diameter 38.5 cm). The top cover of the Ferraris can be easily lifted allowing good frontal access in case of service interventions.

The mixing process is optimized through electronic control of acceleration and deceleration of rotation. The machine is equipped with a sliding door.

The use of rugged and durable components make the Ferraris the best choice for heavy usage environments where large cans are handled frequently.
