

Mixer

Galileo

PRODUCT INFORMATION

- Bi-axial gyroscopic mixer
- Up to 35 kg
- Automatic clamping
- Maximum can height: 44 cm
- Fully extractable loading plate
- Adjustable digital timer

The Galileo automatic mixer (up to 35 kg) has been designed with a strong emphasis on ergonomics, design and ease of operation, including a fully extractable loading plate and automatic clamping.

The mixing process is optimized through electronic control of acceleration and deceleration of rotation. The convenient transparent door with safety interlocks, the membrane keyboard, the electronic timer (up to 9 minutes and 45 seconds of mixing time), the display and the emergency switch are other characteristics of this versatile and durable mixer.

The Galileo: a top of the range mixer for demanding environments.
