

Automatic dispenser

Harbil 450 [HA450]

- High Speed Package
- Dispense speed up to 2L/min
- Shot sizes down to 1/576 fl.oz.
- 32 canisters from 2 up to 10L
- Stainless steel Twin Ball Valve®
- Easy Brush System

The need for maintenance has been reduced to almost zero. Features are f.e. minimal operator activity on brush cleaning, stainless steel in working areas and easier access. The new design offers easy refilling because of a low front edge. Any desired height for optimal ergonomics can be selected. With the new High Speed Package up to 40% dispense time reduction will be obtained. The HS Package icw the right pumpsizes (1, 2, 5 and 10 fl.oz) optimizes your machine performance. Speed combined with high reliability results in the lowest TCO.

The HA450 is the ideal solution for DIY, medium-sized retail or service centres and is suitable for different kind of colorant systems. The machine is equipped with 16 to 32 canisters (36 pump positions) from 2 to 10L, polymeric or stainless steel and an electric can table as standard. Table configurations, machine height, machine colours, stickering and numerous other options enable us to customize the HA450 dispenser to meet your specific needs!
