

Automatic dispenser

Harbil 650 [HA650]

PRODUCT INFORMATION

- High Speed Package
- Dispense speed up to 2L/min
- Shot sizes down to 1/576 fl.oz.
- 36 canisters from 2 up to 20L
- Stainless steel Twin Ball Valve®
- Easy Brush System

The need for maintenance has been reduced to almost zero. Features of the HA650 are f.e. minimal operator activity on brush cleaning, stainless steel in working areas and easier access. The new design offers easy refilling because of a low front edge. Any desired height for optimal ergonomics can be selected. With the new High Speed Package up to 40% dispense time reduction can be obtained. The HS Package icw the right pump size (1, 2, 5 and 10 fl.oz) optimizes your machine performance. Speed combined with high reliability results in the lowest TCO.

The HA650 is the ideal solution for large retail outlets and service centres and is suitable for critical waterborne, solvent-based and aromatic colorant systems. The machine is equipped with 12 to 36 canisters from 2 to 20L, polymeric or stainless steel and an electric can table as standard. Table configurations, machine height, machine colours, stickering and numerous other options enable us to customize the HA650 dispenser to meet your specific needs!
