Accutinter 1500 Automatic Colorant Dispenser

Make the move from manual dispensing to full automation with Fluid Management's new Accutinter 1500.

Improved color accuracy can mean higher customer satisfaction and higher profitability.

To maintain a competitive edge, retailers still tinting manually need to find a sophisticated yet affordable way to make the move to full automation. Fluid Management's AT 1500 is designed specifically to meet the demands of the low-volume environment. It readily delivers the advanced performance and ease of use that will keep you competitive—with an entry-level price that fits almost any budget. With Fluid Management's proprietary DVX pump technology and ColorPro software, the AT 1500 can dispense a sequential stream with absolute precision. Check out the AT 1500 and start enjoying superior color accuracy, reduced waste from mis-tints, improved employee efficiency—and greater customer satisfaction.

Fluid Management integrates the latest technology and design innovations with the AT 1500 in addition to a full line of Accutinters. As part of a wide range of complete solutions, Fluid Management combines powerful DVX technology, ColorPro software and a full line of superior mixers. This breadth of experience and constant innovation translates into you worrying less about your equipment, and more about serving your customers. When making the choice for your next automatic dispensing system, consider the only company to offer complete engineering, manufacturing, software development, after sales service and support for its entire product line all in house.

ColorPro software
drives easier and more accurate dispensing

Patented DVX Pump Technology

Reliability

Delivers repeat formulas with unmatched consistency

Accuracy

Powerful DVX technology provides unparalleled accuracy down to a shot of 1/384th oz.

Durability

Quality construction means reduced component wear and lower cost of ownership

Easy-to-access
quart and one-gallon shelf

AT 1500 Key Features

- **Reliability:** Sequential, single-stream dispense via ganged nozzle.
- **Precision Tinting:** ColorPro monitors colorant levels, and DVX pump technology dispense assures accuracy within 1/384th of an ounce.
- **Compact Footprint:** Measures just W-30" x D-24" x H-48". PC can be stored on back of system.
- **Maintainability:** Easy access to service unit, and easy-to-clean surfaces.
- **Ease of Operation:** Easy to learn means staff can operate with minimal training and minimal mistakes.

Key Specifications

Dispense	1/384th oz. minimum shot
Dispense Type	Sequential single stream
Number of Canisters	Up to 16 canisters
Canister Volume	3 quarts
Agitation	Programmable Automatic Agitation
LED Can Locator	Yes
Nozzle Closure	Manual
Safety	UL, CE
Machine Footprint	W-30" x D-24" x H-48" (12 channel) W-36" x D-24" x H-48" (16 channel)
