FAST LeoLux automatic dispenser

Company profile

Fast & Fluid Management is the world leader in dispensing, mixing and tinting equipment for the paint and ink industry.

Fast & Fluid Management also supplies dispensing and mixing equipment to many other industries, including the food, chemical, flavoring and cosmetic markets.

Product innovation, quality products, special engineered products and customer support have elevated the company to the leading position it enjoys today. We operate in almost all the nations around the globe through our own offices and network of agents. All these operations provide professional, local assistance and services, making Fast & Fluid Management a true partner for your business.

Automatic dispensers

Fast & Fluid Management's automatic dispensers make custom blending easy and flexible. Producing only your immediate requirements and reducing your stock levels by just-in-time delivery; it minimizes waste and ensures an exact color reproduction. You will be able to make any color in any quantity at any moment in time.

Flexibility, high accuracy, reliability, ease of operation and minimum maintenance make Fast & Fluid Management's automatic dispensers first choice in many industries. As a result, our equipment can be found in numerous retail environments, service centers and industrial plants worldwide.

Model: Fast LeoLux

Due to the broad range of canister sizes and configurations available, the LeoLux dispenser is very suitable for small to medium-sized retail outlets and service centers. Advanced computerized controls assure a fully automatic dispensing process.

The LeoLux is equipped with 12 to 32 (2.5 to 10 liters) polymeric or stainless steel canisters and the well known piston pump system with very fast spindle mechanics.

The use of stainless steel pumps in combination with the PVDF valve guarantees a smooth and accurate dispensing operation.

The modular design allows easy integration with printers and spectrophotometers. Our PrismaPro dispensing software is continuously kept up-to-date with the latest Windows versions.

Technical data

Number of canisters	12/14/16/18/20/ 24/32
Canister sizes	2.5 / 5 / 10 liter
Material canister / stirrer	stainless steel and polymeric
Valve house	stainless steel with PVDF
Pump type	piston pump
Pump sizes	2 and 5 ounce
Minimum dispensing	1/384 fl.oz
Flow rate	0.40 / 1.0 liter/min
Nozzle closures	integrated
Cleaning system	standard
Maximum can height	45 cm
Can detector	standard
Electric can table	standard
Manual punch	option
Stirring timer	standard
Dimensions (H x W x D)	148 x 86 x 118 cm (monitor excluded)
Machine weight (empty)	365 kg
Power supply	230V/50-60Hz 110V/50-60Hz
Flatscreen	option
CE approved Patent applied
