Our continuous investments in research and development have led us to a comprehensive range of products and services which brings ultimate value in technology and quality proposition. Ease of use together with the lowest cost of ownership and durability are the central drive to Fast & Fluid products evolution.

The new Harbil 450 – optimal ergonomics and flexible in design

Fast & Fluid, The Tinting Company introduces the Harbil 450 as the successor of the Harbil 400. The Harbil 450 is the ideal solution for DIY, medium-sized retail or service centers. The machine is suitable for environments with critical waterborne and solvent-based colorant systems. Compared to the existing models in the market the design of the new Harbil has the following features:

The new Harbil is equipped with 16 to 32 (36 pump positions) polymeric or stainless steel canisters and has an electric can table and centralized automatic bottom stirring as standard.

Come and see us in Hall 5 stand 227 to **X**perience the benefits for you as a customer!
